

A **SOLID ROOF**
THAT DOESN'T DISAPPOINT

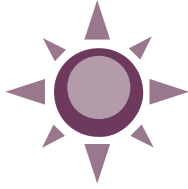

Ultraroof provides plenty of natural light, market leading thermal performance and an **authentic tile finish.**

A **SOLID ROOF** THAT DOESN'T DISAPPOINT

Ultraroor's lightweight tiled conservatory roofing system **with large integrated glass panels** has U-value as low as 0.13 giving you both warmth and brightness in your new room.

For those who want the benefits of a solid conservatory roof, but still want to retain an element of natural light within the room, the clever configurable technology incorporated into the Ultraroor allows the installation of multiple glass panels.

BRIGHTEST

Fully integrated
glazing solution

LIGHTEST

The lightest
tiled roof on
the market

FIRE TESTED

Independently
and fully fire
tested

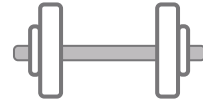

FASTEST

Faster to fit
than any other
solid roof

WARMEST

Unrivalled
thermal
performance

STRONGEST

No tie bar - EVER

Create a truly bespoke design that helps project light into the adjacent rooms to add more value to your home than a traditional solid roof. Not only is Ultrarroof the lightest solid roof available, it is also the strongest, and, unlike other solid roof systems, it never needs a tie bar. Extremely thermally efficient due to its advanced design, the Ultrarroof is fully compliant with Building Regulations and has JHAL system approval, giving you peace of mind from the outset of your project.

It is Ultraframe's policy to continually seek to improve its products, processes and service and we reserve the right to change specifications without prior notice. We have been trading for nearly 35 years and strive to deliver unrivalled quality and service.
