## COMET ALUMINIUM DOORS

**Our distinctive, exclusive to Spitfire collections of contemporary, designer and traditional door styles are becoming the products of choice for members of the public, high-end property developers, self-build home-owners, architects and respected builders.**

At Spitfire Doors we offer a matchless combination of high security, low thermal values, excellent weathering and designer door furniture. Many of our doors offer automatic opening, incorporating Bluetooth or fingerprint recognition technology. Plus, we can supply oversized doors, prevalent in Victorian period properties in London and Dublin and now specified for high-end, contemporary new builds.

Our many years' experience in door manufacturing means we know what it takes to create the most essential property feature, the one that really makes a statement, your front door.

Through our network of approved partners we arrange professional survey and installation and from the moment you contact our team, you can expect expert advice, design capability and exceptional customer service.

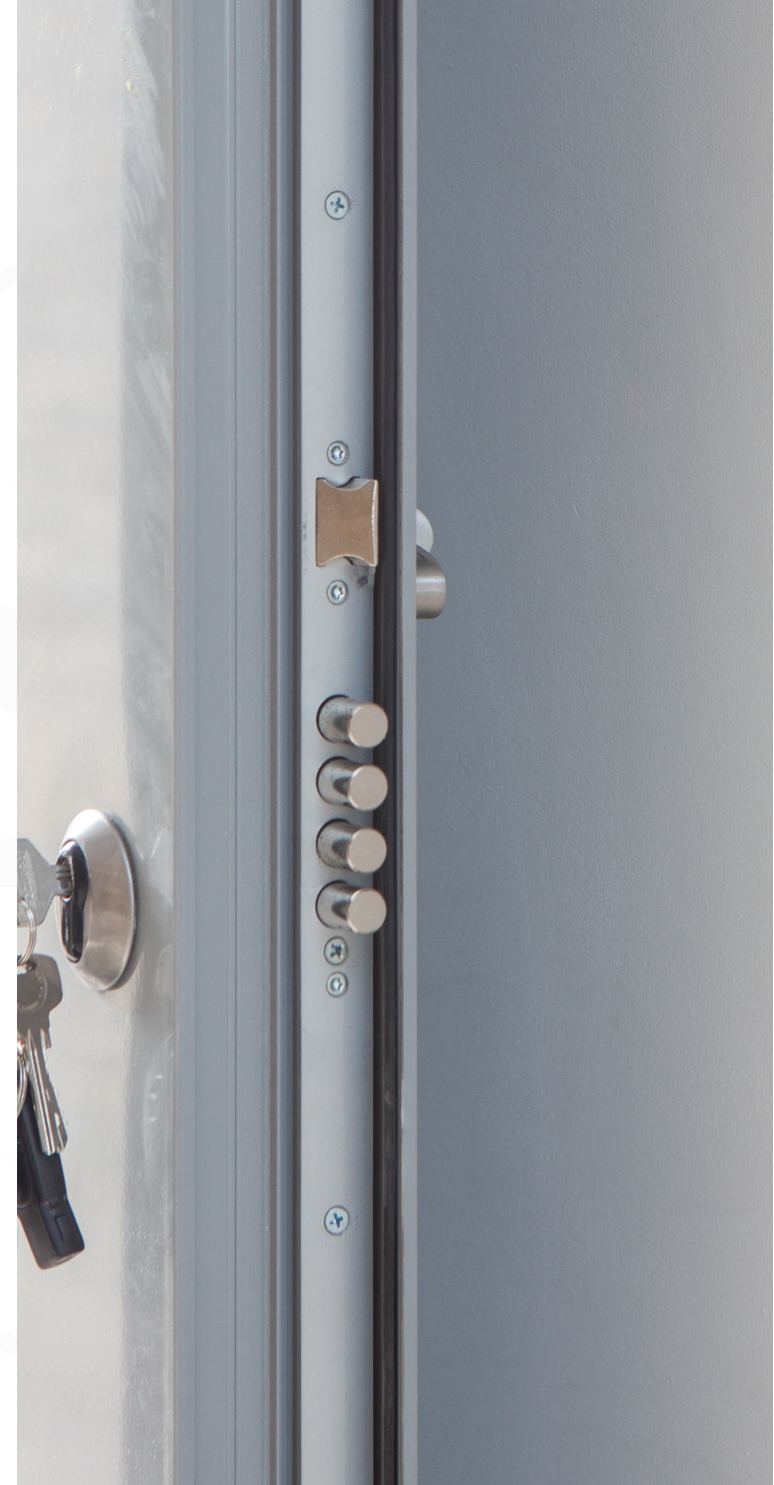

## WHY CHOOSE AN ALUMINIUM DOOR?

### A MATCHLESS COMBINATION

We offer a **bespoke design service** with contemporary and traditional door styles which means we can make the door, sidelights and panels to **your precise specification**.

- **Safe and secure**  
Our aluminium doors offer the highest security with multipoint locks, fingerprint recognition entry, video entry and lighting systems.
- **Long lasting**  
All doors are powder coated and guaranteed to protect you against the elements.
- **Energy saving**  
An aluminium door boasts the lowest thermal values over any other door material.
- **Kerb appeal**  
Exceptional quality finishes and stunning door accessories complete the look.

## ALUMINIUM DOORS WITHOUT MOULDINGS

Modern, contemporary styles with clean lines. Most of the door styles in this section can be combined with an anodised aluminium trim which has a brushed stainless steel-like finish.

## CONTEMPORARY DOORS WITH ANODISED ALUMINIUM TRIMS

These modern door styles feature an integrated aluminium trim which has the appearance of brushed steel. The trim sits slightly proud of the door sash and adds a unique feature to every style.

## STYLISH MODERN DOORS THAT COMBINE GLASS WITH ANODISED TRIMS

*“Comet doors are perfect for apartments or modern new builds because they can be painted any colour; can have large glass areas and offer a high level of security.”*

## COMBINE COLOUR AND TEXTURE

Combine design, style, colour and texture with our range of dual colours or painted wood effect finishes, often with anodised aluminium trims. Our wood effect finishes are highly durable and the grain is integrated into the powder coated surface finish. From a few yards away your door will easily pass muster as timber.

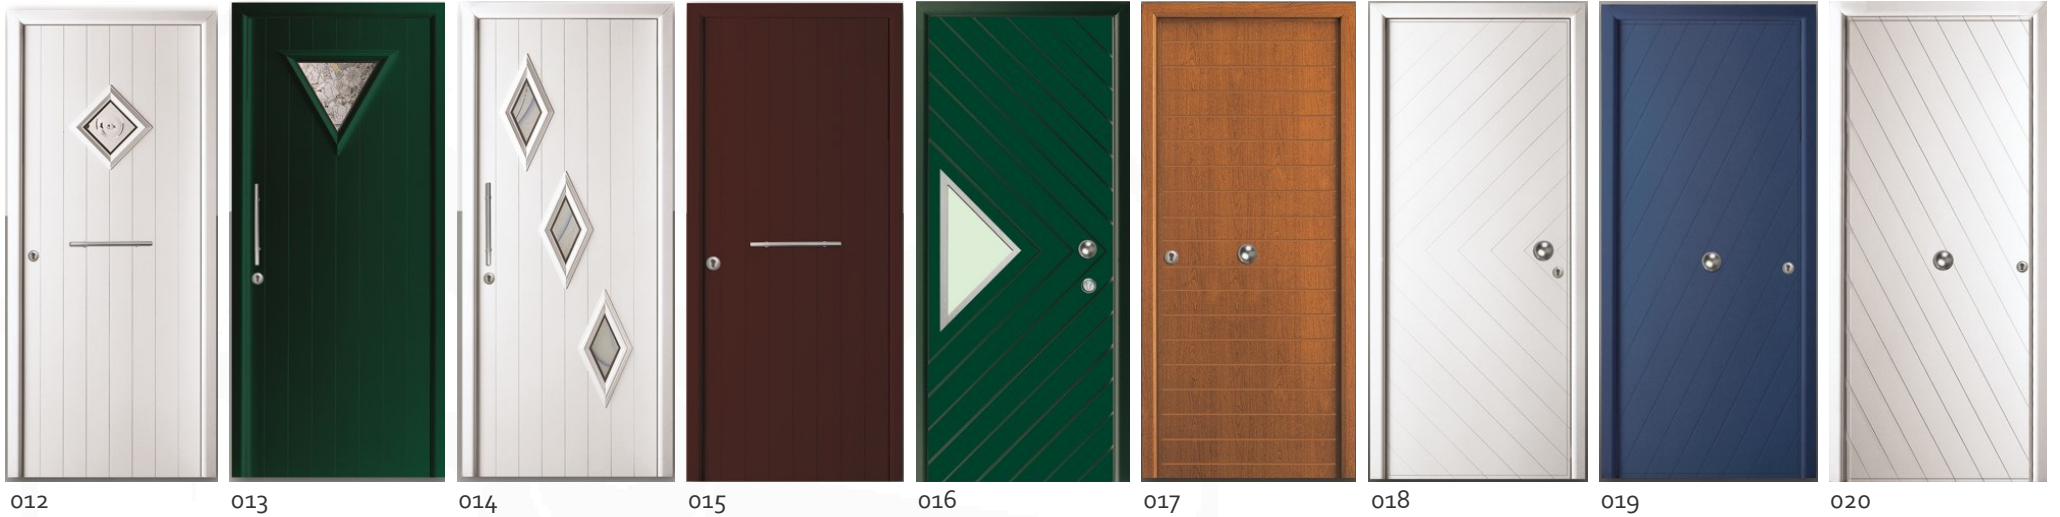

## PULL BAR HANDLES

Comet doors are available with a choice of steel pull bar handles at 400mm, 600mm, 1000mm, 1400mm or 1800mm centres.

**SPITFIRE®**  
DOORS

Available with 4, 7 or 9 horizontal grooves

## GET THE TONGUE AND GROOVE LOOK

These tongue and groove doors work on traditional homes but can also be installed in contemporary buildings. Tongue and groove is a very versatile concept.

## THE LOOK OF WOOD WITHOUT THE HASSLE

With our fabulous impregnated aluminium skins

No maintenance, all the benefits of aluminium and none of the hassle of timber. Much better thermal values and no chance of warping, shrinking or bowing.

Style 83 | Traditional door with glazed side lights

Style 058 | French or double doors

Style 003 | French or double doors with glazed side lights

## DOUBLE DOORS AND SIDE LIGHTS

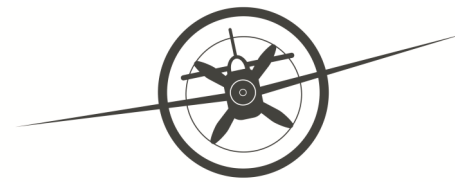

Most of our door styles suit any configuration whether it's French doors, double doors, door with sidelights or matching panels.

## WIDTH AND HEIGHT

**Spitfire Aluminium Doors** can be manufactured to **1.2m wide**, plus sidelights. Very few door manufacturers can offer that width of opening and combine it with a **height of 2.4m**.

## AND BLACK DOORS?

Not a problem.
